

FlowJo Data Analysis Training

The Flow Cytometry Core Facility is sponsoring a FlowJo Data Analysis Software Training class on Tuesday, May 19th, 2009 in the ACHS Lab, West Complex. The training class will be provided by John Quinn, Ph.D., Application Scientist for Treestar, Inc. It will be broken up into two sessions. The morning session (9:30-12:30) will be for the new or limited-experience user and the afternoon session (1:30-4:30) will be for the more advanced or experienced user. Please contact Lesa Campbell @ 243-2711 or lc4ae@virginia.edu if you would like to attend. Registration is limited, so please sign up early.

Tentative Schedule

Morning Session

9:30 -10:00 Training begins with a PowerPoint overview and outline of the day

10:00 - 12:30 FlowJo demonstration in which the users follow along step by step through the analysis of an experiment learning to:

- Load data,
- Make/edit groups
- View/edit meta data
- Set/edit gates
- Make table & figures
- Use the batching function efficiently to expedite analysis

12:30 - 1:30 Lunch break

Afternoon Session

1:30 - 2:30 Creating and using templates and discussion and demonstration on compensation theory and application

2:30 - 3:30 Special analysis platforms - Cell cycle, proliferation, kinetics

3:30 - 4:30 Open question and answer time. Attendees are also encouraged to bring their own data and try applying what they've learned.
