## **Selected Comments from the March 2009 evaluation forms:**

How will the information you received change your practice?

- This course broadened my knowledge base / gave me more confidence / gave me a better understanding of issues (6)
- Plan to start journal club /review literature more/use more evidence based approach (4)
- I learned so much evidence based info that I will change multiple practice areas
- Better understand the ICU populations / illness and improve my assessments and recommendations

Additional Comment and Suggestions:

- By far the best conference I have ever gone to—keep up the good work.
- I have attended many workshops and this is one of the best I have attended. I would recommend it to everyone who wants to learn.
- Highly recommend!
- Every speaker was excellent!
- This was an excellent seminar—very well done, with wonderful speakers—job well done! Thanks for all of your efforts!
- Good handouts (2)
- Everyone was well prepared; very knowledgeable. The sessions were great. Lectures were the right length of time.
- This was a wonderful seminar; well worth my time. I gained new knowledge and see areas that I need to work on in my assessments. Thank you so much for all of the effort put into this valuable seminar!
- This has been a very positive experience. The teaching was excellent!
- Evidence based practice is being talked about for years now, however, they do not teach how to go about it—this course taught me what to do.
- Great information for a new nutrition support member
- Very informative
- Case studies were great; you have equipped us with great tools.
- Thank you! Great program!
- Good weekend—thanks!
