

CORES Billing System

The GCRC bills through the CORES billing system. Investigators new to using CORES should e-mail Callen Molenda (acm7h@virginia.edu) for information and access.

Investigators should direct questions about specific CORES assay charges to the Core Lab Staff and questions about PTAO's to Ms. Molenda.

Core Lab Charges

The current charges for Core Laboratory assays are listed below. These prices are based on the cost of assay kits/reagents. Investigators should use the updated assay rates as they submit grant renewal or continuation budgets.
