

## FOR CHILDREN WHO ARE VISITING FRIENDS OR FAMILY IN THE HOSPITAL

The person you are visiting, called a patient, may be sick, hurt, having a baby or an operation. You can help all patients by:

- Washing your hands and staying off the floor to help keep germs away,
- Leaving all equipment and containers alone to keep yourself safe,
- Talking or playing quietly and staying with an adult at all times,
- Bringing a card, picture or cheerful smile and keeping the visit short.

You might want to draw a picture or write a letter to the patient you are visiting in the space below:
