

Discharge

- On the day of discharge, patients are asked to check out of their rooms by 11:00 a.m.

Cafeteria Hours (for visitors/family)

Lunch 11:30 a.m. - 1:30 p.m., Monday - Friday

Smoking

Smoking is only allowed in specified areas outside the building.

Telephones

Telephones are located in all patient rooms. To make an outside call, dial 9 and then the number.

Parking

Free, convenient parking is provided on a daily basis.

Visiting Hours

Patients are usually involved in therapy sessions from early morning to late afternoon, Monday through Friday.

Visiting hours are 9:00 a.m. to 8:00 p.m. seven days per week. Patients are allowed one visitor during therapy sessions.

Safety

For identification purposes, patients must wear wristbands at all times. We encourage patients to travel independently throughout the hospital. However, patients should be accompanied by a staff member or a family member when outside the building.

Payment

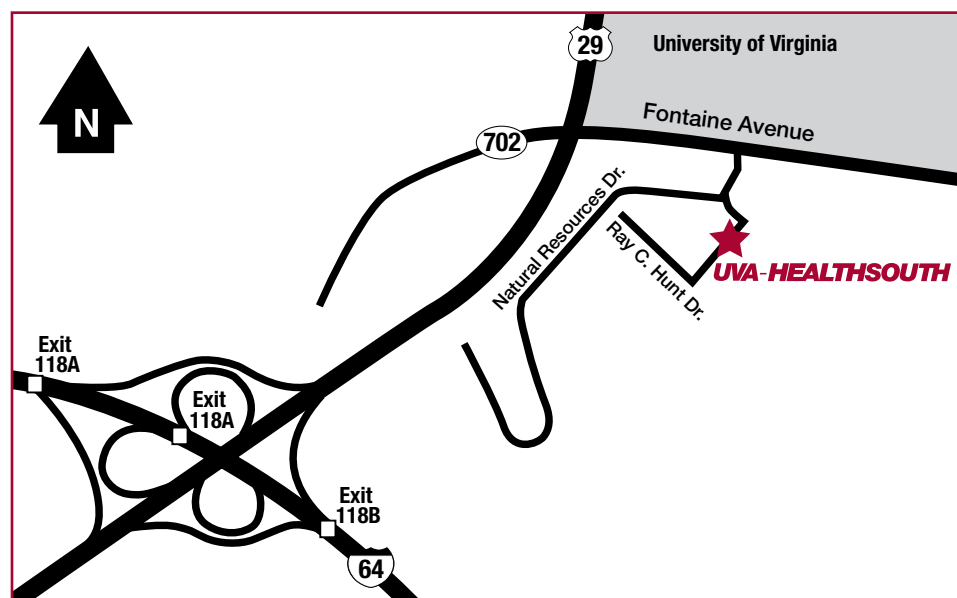

We strive to make payment procedures as easy as possible. Facility personnel are available to meet with patients, families or other responsible parties to discuss billing procedures and requirements.

Questions

Any questions or concerns you may have should be shared with your case manager or any staff member. After hours and on weekends, the administrator on call is available to address any concerns.

Patient Satisfaction

It is our goal to provide high-quality patient care. If you have any concerns during your stay at UVA-HealthSouth, please let us know by calling the quality improvement coordinator at 434 244-2008.

HealthSouth's Inpatient Rehabilitation Guide

UVA-HEALTHSOUTH

Rehabilitation Hospital 

Inpatient Rehabilitation Guide

Welcome

The UVA-HealthSouth staff welcomes you to our rehabilitation hospital. We take pride in serving our community and are committed to offering the care and support you need to achieve the most complete recovery possible.

We will develop an individualized treatment plan based on the needs and goals identified by you, your family and our rehabilitation team. Then we will use that plan as a guide, working together to help you reach the highest level of physical, social and emotional well-being.

As one of the nation's largest healthcare services providers, UVA-HealthSouth maintains the highest standards with respect to the safety and cleanliness of our facilities and the training and experience of our staff. As a result, you can be sure of receiving exceptional care.

We hope this brochure answers any questions you have about your stay. If you have any additional questions or concerns, please let us know and we will be happy to assist you.

Live Without Limits

Evaluation and Treatment

Each patient has an individualized care plan that is reviewed and updated regularly to ensure that realistic goals are being achieved. The rehabilitation team consists of:

- Physician
- Physical therapist
- Speech/Language pathologist
- Occupational therapist
- Respiratory therapist
- Case manager
- Dietitian
- Rehabilitation nurses
- Patient/Family

Therapy

- **Occupational therapy (OT)** – teaches patients self-care skills for activities of daily living, such as bathing, dressing, eating and food preparation. Therapists address cognitive (thought) and perceptual (visual) deficits.
- **Physical therapy (PT)** – focuses on mobility. Therapists assist patients in walking, teach wheelchair transfer techniques and provide orthotic/prosthetic device evaluation and training.
- **Respiratory therapy (RT)** – helps patients with respiratory muscle weakness or a susceptibility to respiratory difficulties to help prevent breathing problems.
- **Speech/Language pathology (SLP)** – diagnoses, evaluates and treats language/communication (listening, talking, reading, writing), speech (articulation, fluency), voice, cognition (problem-solving, organization, memory) and swallowing (dysphagia) disorders.

Services

- **Case management** – coordinates your care, works with you and your family regarding plans for discharge and serves as a liaison between the patient, family, insurance carrier, treatment team and community agencies.
- **Physician services** – physicians specializing in physical medicine and rehabilitation (physiatry), as well as other specialists, work to provide patients with comprehensive medical care and treatment.

- **Rehabilitation nursing** – teaches patients and families how to manage healthcare needs after leaving the hospital.
- **Nutritional counseling** – our registered dietitian helps patients and families develop proper diets and menus to help prevent future health problems.
- **Home assessments** – therapists can arrange a visit to the patient's home before discharge and make recommendations about structural or other adjustments needed to accommodate the patient's new needs.

Clothing

We suggest wearing casual, comfortable clothes that allow easy movement for therapy. Clothing should be labeled with the patient's name, and all valuables should be left at home. Patients should bring the following:

- Seasonal outerwear
- Shirts/blouses with button fronts or pullovers that fit easily over the head
- Comfortable slacks, sweatpants or a sweatsuit
- Athletic shoes with good support
- Undergarments
- Pajamas or gown, robe, slippers
- Toilet articles such as toothpaste, toothbrush, comb, brush, deodorant, etc.
- Any corrective devices, such as dentures, eyeglasses, hearing aids, etc.

Transportation

If you are in an acute care hospital, discuss transportation arrangements with your discharge planner/social worker.

Medication

It is important that all medications (prescription or over-the-counter) be administered by a rehabilitation nurse. Please bring a list of medications you are currently taking. Medications should not be brought from home unless advised by your physician or a UVA-HealthSouth representative.

Meals

Meals are planned daily by your nutritionist and physician to account for your current medical needs. Patients eat all meals in the hospital dining room as part of their rehabilitation plan.
