

Robert Vogel, M.D., F.A.C.C.

Professor of Medicine

Director of Clinical Vascular Biology

Dr. Vogel is Professor of Medicine and Director of Clinical Vascular Biology at the University of Maryland School of Medicine. He obtained his undergraduate degree in physics from Columbia University and his medical degree from Yale University in 1967. Following residency and fellowship training at the University of Colorado, he joined the cardiology faculty at that institution (1975-80). Subsequently, he was Director of the VA Cardiology Section of the University of Michigan until 1987, when he moved to the University of Maryland as Head of the Division of Cardiology, a position he held until 2000.

Dr. Vogel's research interests have focused on application of scintigraphic, digital radiographic and ultrasonic imaging assessment of coronary artery disease. His group originated the techniques of tomographic and quantitative myocardial perfusion scintigraphy, and was the first to employ on-line perfusion imaging and quantitative coronary angiography in the catheterization laboratory. At the University of Maryland, Dr. Vogel originated a comprehensive risk factor modification program, and has demonstrated the effects of risk factors, including serum cholesterol, diet and exercise, on endothelial function. He is the author of more than 220 papers, books, and book chapters.
