

## ROTATIONS

The resident will complete a one year longitudinal residency with practice experiences at multiple sites. An adult internal medicine multidisciplinary clinic will serve as a core experience for the resident. This clinic serves approximately 6,000 patients comprising over 30,000 visits annually. Experiences are provided in areas of diabetes, hypertension, hyperlipidemia, anticoagulation, tobacco cessation and in chronic lung disease. Other experiences may include Lipid Clinic, Palliative Care, Hematology/Oncology Clinic, an Integrated Medicine Clinic, Diabetes/Cardiology Clinic, Cardiac Rehabilitation Clinic, Geriatric Clinic and possible time in the University's rehabilitation site or providing home visits. The resident will be able to choose those areas in which the resident wishes to become proficient.
