

UVA CANCER CENTER
An NCI-Designated Comprehensive Cancer Center

Lana Garmire, Ph.D
Associate Professor
Dept. of Computational Medicine and Bioinformatics, School of Medicine
University of Michigan

***Modern Tales of Survival Prediction by Deep-learning
Using Multi-modal Data***

**Friday, Sept. 2nd, 2022,
Presentation will take place in person in Pinn Hall 1014
12 - 1 pm**

Dr. Lana Garmire is an associate professor of Computational Medicine and Bioinformatics from the University of Michigan. Her research interest includes single-cell sequencing informatics and genomics; precision medicine through integration of multi-omics data types; novel modeling and computational methods for biomarker research, and population science. She has published over 90 papers in top quality journals and delivered over 70 invited talks. She is a standing member of the BDMA study section and serves on the editorial advisory board for journals such as *Genome Biology*. Her work has been continuously funded by NIH in the last 10 years. Among her awards, noticeable ones include US Presidential Early Career Scientists and Engineers (PECASE), and fellow of American Institute of Medical and Biological Engineering (AIMBE).
